

## Project Executable Files

|                      |                                                   |
|----------------------|---------------------------------------------------|
| <b>Date</b>          | 25 May 2026                                       |
| <b>Team ID</b>       | xxxxxx                                            |
| <b>Project Name</b>  | Smart Lender – AI Loan Approval Prediction System |
| <b>Maximum Marks</b> | 3 Marks                                           |

### Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

#### Step 1: Submission Checklist

| S.No | Item to Submit                                                  | Submitted (Yes / No / NA) |
|------|-----------------------------------------------------------------|---------------------------|
| 1    | Complete source code (all files and folders)                    | Yes                       |
| 2    | README / Setup Guide (instructions to run the project)          | Yes                       |
| 3    | requirements.txt / package.json / dependency file               | Yes                       |
| 4    | Database schema / seed files (if applicable)                    | N/A                       |
| 5    | Environment configuration file (.env.example or similar)        | Yes                       |
| 6    | Deployed application URL (if hosted)                            | Yes                       |
| 7    | APK / Executable binary (if applicable for mobile/desktop apps) | N/A                       |
| 8    | Dockerfile / Containerization config (if applicable)            | No                        |
| 9    | Test files and test results                                     | Yes                       |
| 10   | Demo video or walkthrough (if required)                         | Yes                       |

## Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

[Paste or describe your folder structure here. Example:]

```

/project-root
/src    - Source code files
/tests  - Test files
/docs   - Documentation
/config - Configuration files
README.md - Setup and run instructions
requirements.txt - Python dependencies (or package.json for Node)
  
```

## Step 3: Deployment / Access Details

| Field                       | Details                                                   |
|-----------------------------|-----------------------------------------------------------|
| Hosted / Deployed URL       |                                                           |
| Login Credentials (Demo)    | [Provide demo username and password for evaluator access] |
| Platform / Hosting Provider | [e.g., Render, Vercel, AWS, Heroku, Azure]                |
| Repository Link             |                                                           |
| Demo Video Link             |                                                           |

## Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

### Pre-requisites:

[List required software, versions, and system requirements]

Step 1: [e.g., Clone the repository: `git clone <url>`]

Step 2: [e.g., Install dependencies: `pip install -r requirements.txt`] Step

3: [e.g., Configure environment: copy `.env.example` to `.env`] Step 4:

[e.g., Run database migrations: `python manage.py migrate`] Step 5:

[e.g., Start the application: `python manage.py runserver`] Step 6:

[e.g., Open browser at `http://localhost:8000`]

## Step 5: Known Issues / Limitations

| S.No | Known Issue / Limitation                           | Workaround / Status                       |
|------|----------------------------------------------------|-------------------------------------------|
| 1    | Prediction depends on the training dataset quality | Improve dataset with more real-world data |
| 2    | No real-time credit score verification             | Can be integrated in future versions      |
| 3    | User authentication is not implemented             | Planned as a future enhancement           |
