

Scalability & Future Plan

Date	25 May 2026
Team ID	XXXXXX
Project Name	Smart Lender – AI Loan Approval Prediction System
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Supports only local deployment	Limits access for multiple users	High
2	Uses a static CSV dataset	Cannot process real-time banking data	High
3	Basic user authentication	Limited security for production use	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports a limited number of users	Deploy on cloud platforms to support more concurrent users.
2	Data Storage	CSV file storage	Integrate MySQL or MongoDB for scalable data management.
3	Performance	Local Flask server	Optimize the ML model and deploy using cloud infrastructure.
4	Security	Basic authentication	Implement role-based access control and data encryption.

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	Deploy the application on a cloud platform	1–2 Months	Improve accessibility and availability
Phase 2	Integrate a real-time banking database	3–4 Months	Enable real-time loan processing
Phase 3	Add advanced authentication and security features	5–6 Months	Enhance data privacy and system security
Phase 4	Develop a mobile application and analytics dashboard	6-12 Months	Improve user experience and business insights
